CYNERGISTEK

What's Current?

The complexity of today's IT initiatives, and the investments being made, demand the participation of a knowledgeable expert in the field of information security. Unfortunately, too few healthcare organizations have been able to staff their information security program offices adequately. The risk is simply too great to rely exclusively on your product vendors or staff generalists to ensure that the information security considerationsof projects are being managed properly.

Shortcut

- Ensure that each and every IT project is vetted and supported with the appropriate level of IT security expertise – administrative and technical

- Receive expert consultation on new regulations, best practices and industry trends

- Procure in a retainer service or via "on demand" project-based support

SecureIT Program Advisor

What does your Information Security Program need to look like? What policies and procedures need to be in place? This all depends on the kind of business that you operate, the kinds of technology that you have in place and the goals that you have.

CynergisTek's SecureIT Program Advisor is an extension of your own team to ensure that you have the expertise you need to develop and maintain security programs, policies and procedures, including disaster recovery, incident response, auditing and monitoring, and other key components. The service is both affordable and accessible because SecureIT Program Advisor services are principally provided remotely. With SecureIT Program Advisor, practical and effective information security is achievable for your organization.

SecureIT Technical Advisor

- What applications and network infrastructure do you need to support your business?

- How do your workforce and business partners need to access those applications and services?

- How do you continue to plan for future needs?

- How do you ensure that security is implemented correctly at the network and end user levels?

- Will your network support the implementation of resource-intensive applications?

- Does your current network segmentation accommodate the security paradigm for those new applications?

SecureIT Technical Advisor (cont'd)

- Do you have the right portfolio of technical tools to support information security operations and regulatory compliance?
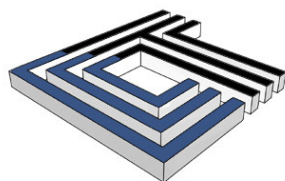

CynergisTek's SecureIT Technical Advisor ensures that you have the expertise to integrate information security into every technical project. Our security architects and analysts provide both on-site and remote support,as needed, making this service affordable and practical. Further, TekTrak, our proprietary project management portal, gives your staff access to our staff for day-to-day support and guidance.
